PROFESSIONAL SUMMARY

I am a software engineer passionate about building practical, scalable, and maintainable software. My development experience spans backend engineering, RESTful APIs, databases, frontend development, mobile application development, authentication, security, testing, and full-stack application architecture.

PROFESSIONAL EXPERIENCE

Software Developer <i>Sheger system</i>	08/2020 - 10/2025 Addis Ababa
Web Developer <i>NEO AI Technologies</i>	08/2023 - 11/2023 Addis Ababa

EDUCATION & TRAINING

Bachelor of Science - BSc, Computer Science and Engineering <i>Adama Science and Technology University</i>	06/2020 - 06/2025
Advanced Digital Skill Training in Full-Stack Software Development <i>Addis Ababa University</i>	01/2026 - Present

TECHNICAL SKILLS

Frontend Development HTML5, CSS3, JavaScript, Angular, React, UI/UX Implementation, Responsive Design	Backend & Software Systems C#, .NET SDK, Scala, Functional Programming, psql (PostgreSQL), Asynchronous Programming
Architecture & Infrastructure API Development, Notification Integrations (SMS/Delegate Patterns), Event-Driven Architecture	Tools & Development Ecosystem Linux Terminal, Git/GitHub, VS Code, Environment Provisioning

KEY PROJECTS

Training Management System (TMS) Backend Suite

- (bullet) Designed and deployed enrollment logic integrating delegate-driven software layers for cross-module synchronization and multi-tier student data orchestration.
- (bullet) Implemented an event-driven notification component implementing the C# Delegate pattern to decouple SMS/system messaging flows from primary transactional databases.

OneGov-Unified E-Government Service Platform

- Full-Stack Developer*
- (bullet) Contributed to a national digital platform integrating government services into a single portal, enhancing efficiency, transparency, and citizen access through secure digital identity and streamlined workflows.

Fetan Digital Platform for Home Renovation and Maintenance Expert

- Frontend Developer and Data base Integration*
- (bullet) As a frontend developer, I successfully integrated dynamic user interfaces with backend databases, ensuring seamless data flow and enhancing user experience. My contributions included optimizing performance, implementing responsive designs, and utilizing APIs for efficient data retrieval and manipulation. This resulted in improved application responsiveness and user satisfaction.
